

DISEASE

The employee responsible for the prevention measures has been sick for a long time, so these have been neglected.

In the next round, the attack is only successfully prevented on a 1.

CONSULTANT

During the attack, an IT security advisor happens to be in the company who can help you.

In the next round, the attack is successfully detected on a 1, 2 or 3.

STAFF TURNOVER

A new employee takes over the detection software, as he has little experience with the product, the maintenance takes longer than expected.

In the next round, the attack is only successfully detected on a 1.

VACATION

You are currently on vacation and cannot be reached during the attack.

In the next round, the attack can only be prevented.
